Dear Customer

We are happy to announce the release of the new EC POWER SERVICE APP. It is an extension to the EC POWER Service Database and gives you the opportunity of making documentation of XRGI® service tasks very fast and easy.

Description

A new tool in the EC POWER Service Database makes it easy for your planner to create service tasks, assign them to specific service employees and schedule them for specific dates. Through the SERVICE APP, the service employee can then, among other things,

- retrieve the service task,
- read service report history on specific XRGI® units,
- register use of parts/materials,
- track time and driving distance,
- take pictures/notes,

and finally upload all information to the Service Database. In case of limited internet connection or lack of time, the collected reports will be securely stored in the EC POWER Service Database as soon as the device gets connected to WiFi or 3-4G.

Where to find the SERVICE APP

You can find the Service App on the App Store or on Google Play. You can also download it here:

IOS

Android

Windows Mobile is not supported.

How to log in to the SERVICE APP

To log in to the EC POWER SERVICE APP please use your login credentials for the EC POWER Service Database.

Further information

For more information, please watch the promotional video in the Partner Area on www.ecpower.eu.

We wish you a Merry Christmas and a Happy New Year.

Best regards

Your EC POWER-Team
