

## TECHNICAL DATA FOR THE XRGI® 15

Product data sheet in accordance with Regulation (EU) No. 811/2013; 813/2013, Dated 26.09.2019

The XRGI® is a combined heat and power plant (CHP) that works on the principle of cogeneration.

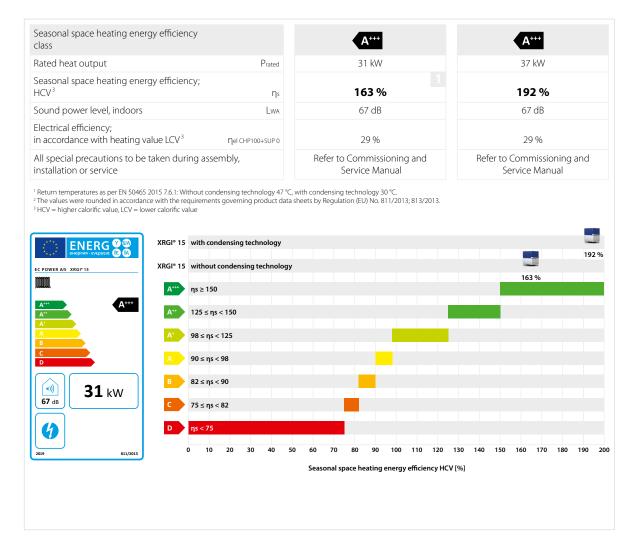

An XRGI\* system consists of three main components – the Power Unit, Q-Heat Distributor and the iQ-Control Panel.

In addition, you can also extend your XRGI\* system with a storage tank with a capacity of 500, 800 or 1,000 litres for optimum operation.

## TECHNICAL DATA FOR THE XRGI® 15 WITH FLOW MASTER

(Temperature control, Class II = 2 %)

Product data sheet in accordance with Regulation (EU) No. 811/2013; 813/2013, Dated 26.09.2019

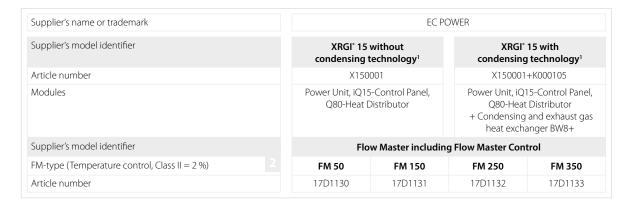

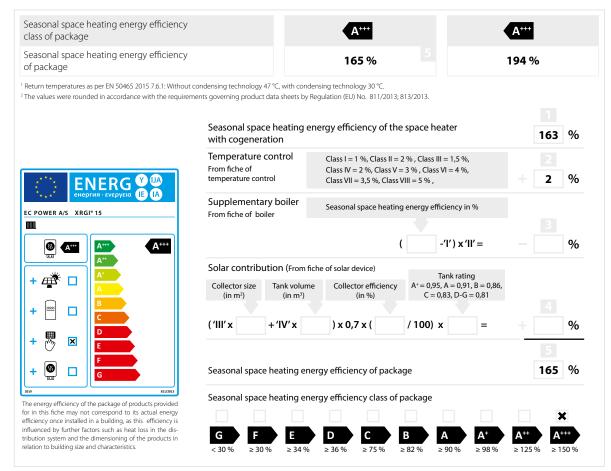

The Flow Master including Flow Master Control regulates the supply of heat from the XRGI\* and from the storage tank to the consumer network. This technology enables a significantly higher heat output to be temporarily made available to the consumer side. This allows peaks of heat demand to be handled by the XRGI\*, thereby extending its service life and increasing electricity production.

The 4 models can deliver a heat output of 50, 150, 250 or 350 at a  $\Delta T$  of 20 K.
